Subject Index of Vol. 35

axisymmetric contraction, 1

birefringence, 105, 277, 361
Boger fluids, 37, 77, 309, 413, 459

circular entry flows, 339
Clausius–Duhem inequality, 15
climbing constant, 287
compressive flow, 413
constant stress rheometry, 189
contraction flow, 121
corrugated tube flow, 405
creeping flow, 327
crossflow permeability, 309

Deborah number, 405
delayed die swell, 287
dilute polymer solution, 445
drag coefficients, 37
dropping spheres, 327
dynamic mechanical properties, 179
dynamic moduli, 169

elastic effects, 37
elastic liquid, 251
elongational flow, 197
elongational viscosity, 215, 263
extensional flow, 231, 251, 309, 459
extensional flow resistance, 405
extensional rheometer, 421, 445
extensional viscosity, 121, 207, 231, 251, 277, 287, 339, 421, 445

falling cylinder, 215
fiber suspensions, 1
fibre spinning, 207
filament elongation, 77
finite chain extensibility, 37
first normal stress difference, 169
flow instabilities, 137
flow stability, 73
Frank elasticity, 51

glass transition temperature, 179

Hamiltonian formulation, 51
horizontal stretching, 251

ideal elastic liquid, 413
inertia contributions and corrections, 137
integral constitutive equation, 459
intrinsic viscosity, 93

melt fracture, 73

normal stress, 189, 401

Oldroyd B model, 207, 413
opposed jets, 231
opposing jet rheometer, 137
orifice pressure drop, 339
oscillatory shear flow, 105

packing in cylinder arrays, 309
pendant drop, 263
Poisson bracket, 51
polyacrylamide solutions, 77
polyisobutene, see *test fluid M1*
polyisobutylene (solution), see *test fluid M1*
polymer degradation, 309
polymer matrix, 1
polymer solution, 121, 421
polymeric liquid crystals, 51
polymers, 159, 197, 263

rapid granular flows, 15
rate-dependent thermodynamical model, 15
re-entrant tube entry flow, 339
relaxation spectrum, 459
rheological properties, 51
rheology, 159, 189, 197
rheometry, 121
rubber-like strain behaviour, 251

second order fluid, 189
second-normal stress difference, 121
shear flow, 159
shear viscosity, 93
simple shear flow, 15
solution, 159, 197, 231

specific gravity, 179
speckle photography, 401
squeezing flow, 413
stagnation point flow, 277
steady shear flow, 105
stress growth, 215
summary, 85

test fluid M1, 85, 93, 105, 121, 137, 159, 169, 179, 189, 197, 207, 215, 231, 251, 263, 277, 287, 309, 327, 339, 361, 401, 405, 413, 445, 459
transient flows, 361
tubular entry flows, 1
two-roll mill, 361

viscoelastic constitutive equation, 459
viscoelastic fluid, 405, 421, 445
viscoelasticity and normal stresses, 137
viscosity, 179

wall effects, 37, 327
wall slip, 73
wave speed, 287
Weissenberg effect, 401

xanthan solutions, 77
